Need help deciding what type of jamb guard you need? See below for an overview of the various options we sell. If you have any other questions, contact us at parts@kpsglobal.com.

CENTERED THERMAL BREAK JAMB GUARD (STYLE A)

Centered Thermal Break Jamb Guards have a nice, clean look with no visible screws and a centered thermal break.

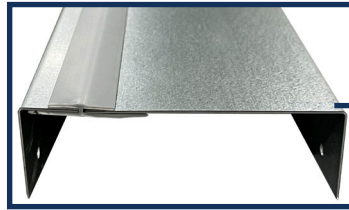

They are sold as a full kit that comes with wood, 18-gauge galvanized steel and a thermal break.

OFFSET THERMAL BREAK JAMB GUARD (STYLE B)

Offset Thermal Break Jamb Guards feature an offset thermal break that is positioned closest to the exterior side of the door.

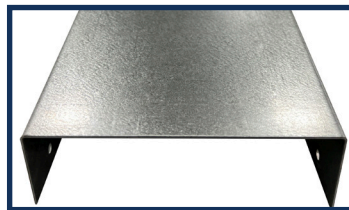

They are made of 18-gauge galvanized steel and a thermal break.

ONE-PIECE JAMB GUARD

One-Piece Jamb Guards are most often used for double-action or sliding doors.

They are constructed of one solid, 18-gauge galvanized steel piece.

ADJUSTABLE JAMB GUARD

Adjustable Jamb Guards are most often used for replacement door installations.

These versatile jamb guards have two 18-gauge galvanized steel pieces that easily adjust for a perfect fit.
